PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 6+ years of hands-on experience architecting and delivering scalable, secure web and cross-platform mobile applications using the MERN stack and React Native. Expert in TypeScript, modern authentication (JWT), REST/WebSocket APIs, and cybersecurity best practices. Proven leadership in end-to-end project delivery for multinational teams, from requirements gathering and UI/UX design through development, testing, deployment, and post-launch optimization. Passionate about building high-performance, user-centric solutions that drive business growth and ensure data security.

WORK EXPERIENCE

Pejul Digital Agency

Nigeria Lead React Native Developer (MERN) January 2025 – December 2025 (Contract)

- Spearheaded end-to-end development of cross-platform mobile and web applications using React Native, TypeScript, and the MERN stack for multinational clients.
- Led a distributed team in building, maintaining, and upgrading Android, iOS, and desktop applications, delivering seamless performance and intuitive UX.
- Collaborated on real-time features with WebSockets, ensuring high-traffic applications met strict performance and compliance standards.

ACADEMIC HISTORY

Delta State Polytechnic | Nov 2013 – Sept 2015

- Delta State Polytechnic, Ogwashi-Uku National Diploma in Computer Science

GSS ALEIBIRI | September 2007 – July 2012

- West African Examination Council Certificate (O' Level)

SKILLS

Languages

JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Frameworks & Libraries

React.js, React Native, Next.js, Node.js, Express.js, Mongoose

Databases

MongoDB, MySQL, SQL, PostgreSQL

Cybersecurity & Tools JWT Authentication, Penetration Testing, Network Security, Data Protection, Git, Docker, CI/CD, Postman, WebSockets, Expo, Figma UI Design, REST APIs

AWARDS AND CERTIFICATION

- Node.js & MongoDB Expert (February 2025)
- Figma UI Design – Google (March 2025)
- Cisco CyberOps (December 2024)
- Nitda Cyber Security (November 2024)
- Cisco Cybersecurity Analyst (June 2024)
- MERN Full Stack (March 2021)
- PHP Backend Development (January 2017)

Pixel Freelancer

USA React.js Developer (MERN) October 2024 – January 2025 (Contract)

- Developed and optimized TypeScript-based web applications using React.js and the MERN stack for U.S. clients.
- Built scalable REST APIs, implemented JWT authentication, and integrated CI/CD pipelines to improve security and deployment efficiency.
- Conducted code reviews and performance optimizations, resulting in faster load times and robust, maintainable codebases.

Runorx, Nigeria

Full Stack Developer (MERN) September 2025 – Present (Contract)

- Architected and developed cross-platform web and mobile applications with React Native and the MERN stack from concept to production.
- Designed and implemented scalable REST APIs and WebSocket integrations for real-time features in high-traffic environments.
- Managed MongoDB and MySQL databases, optimized queries, and ensured data integrity across all layers of the application stack.

Opusam Nig. Ltd

Nigeria Project Manager (Remote) December 2021 – August 2022

- Created comprehensive project timelines and led cross-functional teams, achieving a 20% increase in on-time delivery rates.
- Streamlined workflows and improved collaboration across development, design, and stakeholder teams.

Scottified

Nigeria PHP Instructor March 2019 – September 2021

- Taught advanced PHP backend development and mentored junior developers on best practices and scalable code architecture.
- Designed, wrote, and reviewed production-ready backend systems for multiple client projects.

Tercescrow

Mobile App Google Play Store:
play.google.com/store/apps/details?id=com.tercescrow.app

Timeline: October 2024 – January 2025 Lead Full Stack Developer (React Native + Node.js)

Led the project from initial stakeholder requirements gathering through design, development, testing, deployment, and ongoing maintenance. Collaborated with the product team to define secure gift-card trading features.

Designed intuitive cross-platform UI/UX in Figma using React Native and TypeScript. Built the backend with Node.js, Express.js, and MongoDB, integrating fast-processing REST APIs and JWT authentication for secure transactions.

Implemented real-time features and conducted penetration testing for compliance. Deployed the app to Google Play Store and provided post-launch updates for performance and security.

Above Lifestyle

Mobile App & Web Platform
www.abovelifestyle.com

Timeline: July 2023 – March 2024 Full Stack Developer (React.js + MERN)

Owned the complete lifecycle for this premium leisure destination platform in Lekki, Nigeria. Started with requirements analysis and Figma wireframes, then developed the React.js frontend and MERN backend. Integrated REST APIs for real-time menu updates, booking systems, and reservations. Added secure authentication and payment flows. Tested across devices, ensured responsive design, and deployed the production site, boosting user engagement for fine-dining and nightlife experiences.

The Gifting Service

www.thegiftingservice.com

Timeline: January 2023 – June 2023

Full Stack Developer (React.js + Next.js)

Managed the full development cycle of this personalized e-commerce platform. Conducted requirement sessions, designed the UI/UX, and built the frontend with React.js and Next.js for optimal SEO and performance. Developed the Node.js backend with secure payment gateways and JWT authentication. Implemented product customization logic and checkout flows.

Performed end-to-end testing, security audits, and launched the live site with seamless user experience.

FEATURED PROJECTS

Arctic OBGYN Patient Portal

www.arcticobgyn.com

Timeline: April 2024 – September 2024

Full Stack Developer (React.js + MongoDB)

Directed the entire project for this healthcare provider's patient-facing web application.

Gathered compliance requirements, designed secure appointment scheduling UI, and developed the React.js frontend connected to a MongoDB backend. Implemented encrypted data handling, JWT authentication, and HIPAA-aligned security measures. Conducted thorough testing and penetration reviews before deploying the production portal.

Kokolet Luxury E-commerce

www.kokoletluxury.com

Timeline: February 2024 – July 2024

Full Stack Developer (React.js + TypeScript)

Handled the complete development of this Nike sneaker retail platform in Lagos. Began with market analysis and Figma prototypes, then built a responsive TypeScript/React.js frontend with advanced filtering and cart features. Created the scalable MERN backend and integrated secure checkout. Performed QA, optimization, and launched the e-commerce site with enhanced shopping experience.

Ndozi Business Platform

ndozi.com

Timeline: September 2022 – February 2023

Full Stack Developer (React.js + Node.js)

Led end-to-end creation of this local business marketplace. Started with feature specification, designed real-time UI components in React.js, and developed the Node.js backend for scalable user interactions. Integrated MongoDB and WebSockets for live updates. Completed full testing cycle and deployed the production platform.

Feeda – Personal Social Media Platform

www.feeda.us

Timeline: July 2025– February 2026

Personal Project

Full Stack Developer (React.js + MERN)

Conceived, designed, and fully developed Feeda as a personal passion project — a modern, real-time social media platform for content sharing, community engagement, and dynamic user interactions. Owned the complete end-to-end lifecycle from initial concept and Figma UI/UX wireframing to final deployment and optimization. Built a responsive, high-performance React.js frontend featuring infinite-scroll feeds, posts, likes, comments, user profiles, stories, and real-time notifications. Implemented a scalable MERN backend with Node.js, Express.js, MongoDB, and WebSockets for live updates and messaging. Integrated secure JWT authentication, user management, and privacy controls. Conducted full end-to-end testing, performance optimization, and security audits. The web platform is live at feeda.us; the companion React Native mobile app is currently under Google Play Store review and pending public release.

Quiickchat

– Real-Time Chat Application quiickchat.com Timeline: September 2025 – March 2026 Full Stack Developer (Node.js + React.js)

Directed the full lifecycle of the real-time messaging platform. Gathered requirements, designed modern chat UI with React.js, implemented Node.js backend with WebSockets and MongoDB for instant messaging. Added JWT authentication, scalability features, and conducted performance testing before deploying the production application.

Aetrust Pay – Fintech Payment & Trust Platform

aetrustpay.com

Timeline: February 2025 – Present

Full Stack Developer (MERN + React Native)

Led end-to-end creation of the secure fintech payment and escrow solution. Started with compliance analysis and Figma prototypes, developed React.js/React Native interfaces, built Node.js backend with advanced JWT and data-protection layers. Integrated trust-based payment flows, tested for security, and deployed the live platform.

Linx – Casino (restricted)

Website linxdash.com

Timeline: March 2025 – December 2025

Full Stack Developer (React.js + MERN)

Led the full custom website development for Linx Marketing Agency from requirements gathering to launch.

Designed modern, conversion-focused UI/UX with React.js, integrated SEO, lead-generation forms, marketing automation tools, and analytics dashboards. Built scalable backend services, ensured fast performance and professional branding, and deployed the production site that supports 360° omni-channel marketing solutions.

Prime Procurement Limited – Oil & Gas

Procurement Company Profile

www.primeprocurementus.com

Timeline: June 2022 – October 2022

Full Stack Developer (React.js + MERN)

Designed and developed the complete professional company website and digital portfolio from concept to launch for Prime Procurement Limited, a specialized Oil & Gas procurement and engineering firm.

- Conducted full requirements gathering with stakeholders and created modern, industry-focused UI/UX in React.js with responsive, mobile-first design.
- Built dedicated sections including Oil & Gas Solutions (procurement, engineering, stainless steel, cables, and equipment supply), Project Portfolio showcasing completed energy-sector deliveries, Careers board for offshore maintenance and engineering roles, and interactive contact/lead-generation forms.
- Developed scalable MERN backend for dynamic content management, integrated SEO optimization, fast-loading product catalogs, and secure backend services.
- Ensured high performance, professional branding, and seamless user experience that highlights expertise in oil & gas supply chain, procurement, and energy-sector solutions.
- Performed end-to-end testing, optimization, and deployed the live production site (www.primeprocurementus.com).

Megarusi – Oil & Gas Procurement Company Profile

www.megarusi.com

Timeline: June 2025 – Present

Full Stack Developer (React.js + MERN) Designed and developed the complete professional company website and digital portfolio from concept to launch for MegaRusi Nigeria Limited, a specialized Oil & Gas procurement and engineering services provider in Nigeria.

- Conducted stakeholder requirements gathering and built a modern, industry-focused UI/UX in React.js with responsive, mobile-first design.
- Created dedicated sections for Oil & Gas Solutions, remote tech jobs, engineering services, project portfolio, and career opportunities.
- Developed scalable MERN backend for dynamic content management, integrated SEO optimization, fast-loading product catalogs, and secure backend services.
- Ensured high performance, professional branding, and seamless user experience that highlights expertise in procurement, supply chain, and energy-sector solutions.
- Performed end-to-end testing, optimization, and deployed the live production site.
-

Escrowise.io– Secure Escrow Platform

www.escrowise.io

Timeline: April 2025 – July 2025

Full Stack Developer (Next.js Serverless + PostgreSQL) Architected and delivered the complete secure escrow marketplace from concept to production using Next.js (App Router), serverless architecture, and PostgreSQL. Conducted stakeholder analysis and created detailed Figma UI/UX designs, developed a fully TypeScript frontend with server components, server actions, and dynamic routing. Built scalable serverless API routes integrated with Prisma ORM for PostgreSQL, implemented JWT authentication, secure payment protection, and automated dispute-resolution flows. Performed comprehensive penetration testing and deployed the live production platform on Vercel for safe, high-performance buyer-seller transactions.
